CARON THINKS GREEN

FROM NATURE... WOOD, A LIVING AND NOBLE MATERIAL IS ESSENTIAL TO THE CHARACTER OF OUR PRODUCTS. WOOD IS ALSO PART OF OUR COLLECTIVE HERITAGE. THIS IS WHY CARON IS RESPECTFUL OF THE ENVIRONMENT BY OPTIMIZING THE USE OF THIS PRECIOUS NATURAL RESOURCE AND BY REFORESTING EVERY YEAR MORE TREES THAN THE COMPANY USES, A PREMIERE IN THE INDUSTRY SINCE 2005.

WELCOME TO CARON'S WORLD, WHERE YOU WILL FIND ONE OF THE MOST EXTENSIVE LINE OF CABINET DOORS AVAILABLE ON THE MARKET AND MUCH MORE. AT CARON, WE KNOW THAT NOTHING HIGHLIGHTS QUALITY CABINETRY MORE THAN BEAUTIFULLY CRAFTED DOORS. OUR QUALITY MANAGEMENT SYSTEM REGISTERED UNDER ISO 9001 GUARANTEES THAT EACH COMPONENT MEETS THE HIGHEST STANDARDS OF QUALITY BEFORE IT BEARS THE CARON SIGNATURE ON THE BACK.

GRADE AND SANDING

WOOD IS WONDERFUL... FROM ONE SPECIES TO ANOTHER THERE IS AN INFINITE VARIETY OF COLORS, GRAIN PATTERNS AND PARTICULARITIES. MOREOVER, WITHIN THE SAME SPECIES NO TWO BOARDS ARE IDENTICAL JUST AS NO TWO TREES ARE ALIKE. ENVIRONMENTAL FACTORS SUCH AS CLIMATE, LIGHT EXPOSURE, RAINFALL AND MINERAL CONTENT OF THE SOIL, TO NAME JUST A FEW, CAUSE THESE VARIATIONS.

Most of our components are made from hardwoods harvested in the northern Appalachians, a region renowned for its quality timber and reforestation that ensures the continued protection of this heritage.

As people are becoming more and more concerned about environmental issues, and rightly so, each of us must optimize the use of this renewable, but highly precious resource. We invite you to take the time to thoughtfully choose the type and grade of lumber needed, to ensure the enduring value of your project crafted from this precious resource. Medium to dark or glazed finishes lend themselves well to SELECT or RUSTIC grades. SELECT PLUS grade is favoured for bleached and natural finished which require painstaking color matching. KNOTTY RUSTIC grade is for unconditional wood lovers who appreciate all particularities, lots of character and life.

The following list and pictures are not exhaustive and other types of wood are available on demand. Should any doubts concerning a type or grade of wood persist, we suggest you order our new wood selection and / or a sample door before the complete order.

	GRADE				
WOOD TYPE	RUSTIC (listed prices less 10%)	KNOTTY RUSTIC (listed prices)	SELECT (reference grade for listed prices)	SELECT PLUS (listed prices plus 15%)	TORREFIED (listed prices plus 65 %)
ALDER (red) - AR -	N/A	Natural particularities accepted; color + grain variations. All knots structurally sound accepted.	Natural particularities accepted; reddish color.	N/A	N/A
ASH (white) - F -	Same as select, not selected for color. Mineral + occasional light crazing accepted.	Same as rustic grade with knots without restriction.	Natural particularities accepted; Burls, pin knots, wide range of cream to light brown colors.	Same as select with more color uniformity	Same as select grade with dark brown color created by the roasting process.
BAMBOO - BA -	N/A	N/A	Natural particularities accepted. Close, straightgrain. Light cream color and occasional darker streaks.	N/A	Natural particularities accepted. Close, straight grain. Golden color with light brown streaks created by the roasting process.
BIRCH (red) - U -	Same as select, not selected for color. Mineral + occasional light crazing accepted	Same as rustic grade with knots without restriction.	Natural particularities accepted. Out of heartwood only, reddish color with attractive grain.	N/A	N/A
BIRCH (yellow) - M -	Not selected for color. Mineral + occasional light crazing accepted.	Same as rustic grade with knots without restriction.	Natural particularities accepted. Out of sap wood only, light and fairly uniform in color and grain.	Same as select with more color uniformity.	Natural particularities accepted. Heartwood and sapwood, brown to dark brown color created by the roasting process.
CHERRY - I -	Same as select, not selected for color. Mineral + occasional light crazing accepted. (listed prices -20%)	Same as rustic grade with knots without restriction.	Natural particularities accepted. Gum lines, gum pockets, limited sap wood (max. 20% of front surface).	Same as select with fewer particularities and no sap wood on the face (Except for machined areas)	N/A
FIR (B.C.) - S -	N/A	N/A	Natural particularities accepted. Reddish color, some sap wood.	Natural particularities accepted with more color uniformity	N/A
HICKORY (wild) - H -	N/A	Same as select grade with knots without restriction.	Natural particularities accepted; Wild and wide range of colors (sap and heart wood) not selected for color.	N/A	N/A
MAHOGANY - A -	N/A	N/A	Natural particularities accepted; Pin knots, burl. Golden brown to reddish color.	N/A	N/A
MAPLE - E -	Not selected for color. Mineral + occasional light crazing accepted.	Same as rustic grade with knots without restriction.	Natural particularities accepted; Light and uniform in color and grain. Some mineral accepted on the face without restrictions on the back and edges.	Same as select with more color uniformity and fewer mineral.	N/A
MAPLE Silver - ES -	N/A	N/A	Natural particularities accepted; Light and uniform in color and grain. Some mineral accepted on the face without restrictions on the back and edges. Light silver tones	N/A	N/A
MAPLE (Wild) - EW -	N/A	N/A	All natural particularities accepted without restrictions and in various proportions. Wide range of colors (heartwood and sapwood) not selected for color.	N/A	N/A
MAPLE (Wormy) - SMW -	Not selected for color. All natural particularities accepted as per worm holes, mineral, etc...	N/A	N/A	N/A	N/A
OAK (red) - C -	Same as select, not selected for color. Mineral + occasional light crazing accepted.	Same as rustic grade with knots without restriction.	Natural particularities accepted; Pin knots, some mineral on the face without restrictions on the back and edges. Minimal color variations.	Same as select with more color uniformity and fewer mineral.	N/A
OAK (white) - B -	N/A	N/A	Natural particularities accepted; Pin knots, burl, some mineral. Light brown to greenish gray colors.	N/A	N/A
PINE - P -	N/A	Natural particularities accepted; color + grain variations. All knots structurally sound accepted.	N/A	Natural particularities accepted; uniform in color, grain. Knots not accepted. [clear]	Same as knotty rustic with darker color created by the roasting process.
TEAK - T -	N/A	Same as select grade with knots without restriction.	Natural particularities accepted; High contrast of yellow to dark brown. Oily texture.	N/A	N/A
WALNUT (American Black) - N -	Same as select, not selected for color. Mineral + occasional light crazing accepted.	Same as rustic grade with knots without restriction.	Natural particularities accepted; Light gray brown to dark purplish brown. (swirls, burls)	N/A	N/A

Grade (others)		
Reclaimed (Pine, grey elm as per supply) Reclaimed from dismantled old buildings. May bear nail holes, notches and occasional discoloration.	Water salvaged (Birch) First growth lumber recuperated from watery surroundings. Tight growth rings, unselected for color with mineral staining.	Jointed (Maple, birch, walnut as per availabilities. Listed prices Less 10%) Optimize natural resources by using shorter wood cuts. Not selected for colors.

Sanding	
High technology providing you with: <ul style="list-style-type: none"> • Finish sanding on all surfaces • De-nibbing on all surfaces • Cross-grain marks removal (Front + back) • Packaging with foam between each component 	N.B. Even with this optimal sanding, components shipped unfinished still need a minimum of preparation at your end prior to finishing. This being due to various factors such as handling during packaging and unpackaging, hole drilling for hinges, etc. Your light sanding ensures you better finish uniformity on all elements. (doors, end gables, mouldings, trims, etc.)

These pictures are a general representation of a specific wood type and grade. Since nature never duplicates itself, you may notice a slight difference in color and grain from one order to another, between components, even within the same component. We suggest to order a sample door to see first hand prior to ordering complete projects.

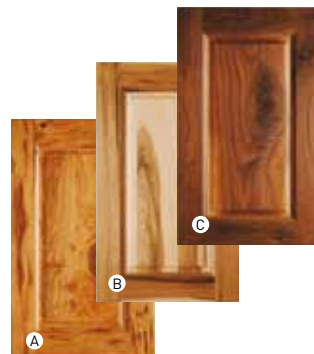

AUTHENTIC STYLE

NATURAL, RUGGED, HOMEY CARON'S NEW KNOTTY RUSTIC GRADE WILL CAPTURE YOUR ATTENTION AND IMPRESS YOU WITH ITS UNIQUE CHARACTERISTICS IN SEVERAL WOOD TYPES SUCH AS BLACK WALNUT, CHERRY, HICKORY, RED ALDER, MAPLE, AND MORE. IT'S A PERFECT DOOR FOR THOSE WHO LOVE REAL WOOD!

IN TODAY'S MARKET, KNOTTY PINE IS THE MOST WIDELY KNOWN RUSTIC WOOD. KNOTTY RUSTIC GRADE GOES ONE STEP FURTHER, WHETHER YOU ARE LOOKING FOR LIGHT-COLORED WOOD WITH DISTINCT CONTRAST (SUCH AS MAPLE OR HICKORY), OR DEEPER SHADES WITH SUBTLER CONTRASTS (LIKE BLACK WALNUT, CHERRY, ALDER, ETC.)

KNOTTY IS IDEAL FOR MANY APPLICATIONS: COMPLETE KITCHEN PROJECTS THAT CALL FOR NATURAL WARMTH AND A HOMEY LOOK (FOR COTTAGES, LOFTS, ETC.) OR ONLY PART OF IT, VANITIES, ISLANDS, SPECIALTY FURNITURE.

- AVAILABLE IN MOST WOOD TYPES

C - 10-1200-N (GR4)-302-01 (3'')-F632

TORRI STYLE

NATURAL WOOD—EVEN BETTER TORRI STYLE GRADE ADDS VALUE TO TRADITIONAL WOOD DOOR AND GIVES IT AN EXOTIC, CLASSY LOOK... AND IT'S COMPLETELY NATURAL PROCESS!

THE TECHNIQUE OF HEATING LUMBER UNTIL IT BECOMES ULTRA-DRY IS CENTURIES OLD BUT HAS ONLY BEEN COMMERCIALIZED RECENTLY, SO NOW YOU CAN ADD AFFORDABLE HIGHLIGHTS TO YOUR PROJECTS.

THE PROCESS RESULTS IN A RICHER, DARKER LOOK, NOT ONLY ON THE SURFACE BUT THROUGHOUT THE ENTIRE PIECE OF LUMBER.

- AVAILABLE IN WHITE ASH, BIRCH, AND KNOTTY PINE
- AVAILABLE IN MOST DESIGNS
- OPTIMAL AND ENVIRONMENTALLY FRIENDLY USE OF NATURAL RESOURCES
- **REDUCED FINISHING COST (NO STAIN REQUIRED)**
- DIMENSIONALLY STABLE AND IMPROVED RESISTANCE TO ROT/INSECTS
- INDOOR AND OUTDOOR APPLICATIONS

C - 10-1200-M (GR7)-302-01 (3'')-F632

HERITAGE_{STYLE}

A SECOND LIFE THE HERITAGE STYLE DOOR COLLECTION IS MADE EXCLUSIVELY FROM CENTURY-OLD LUMBER. IT IS AN ORIGINAL WAY TO INTEGRATE THE PAST AND THE FUTURE BY GIVING A SECOND LIFE TO THIS NOBLE MATERIAL. WHETHER YOU CHOOSE FIRST-GROWTH LUMBER RECOVERED FROM A LAKE BOTTOM OR WOOD TAKEN FROM AN OLD BUILDING, YOUR PROJECT WILL BE TRULY UNIQUE.

THESE ALTERNATIVES HAVE ONE THING IN COMMON: THEY COME FROM LUMBER HARVESTED LONG AGO, THEREBY HELPING TO SAVE TODAY'S FORESTS.

FIRST-GROWTH LUMBER HAS NEVER BEEN USED, IT'S SIMPLY RECLAIMED FROM WATERY SURROUNDINGS. IT FEATURES WARM, RICH COLORS AND SOME DISTINCTIVE MINERAL STAINING AS WELL AS TIGHT GROWTH RINGS.

RECLAIMED LUMBER COMES MAINLY FROM DISMANTLED BUILDINGS. IT MAY BEAR NAIL HOLES, NOTCHES OR OCCASIONAL DISCOLORATION.

- AVAILABLE IN BIRCH, MAPLE, BLACK OAK, PINE AND ELM
- AVAILABLE IN MOST DESIGNS AND DIMENSIONS
- OPTIMAL AND ENVIRONMENTALLY FRIENDLY USE OF NATURAL RESOURCES
- **REDUCED FINISHING COST (STAIN NOT REQUIRED)**

Aging may alter these finishes. Take this into consideration for comparison with former samples and / or projects. These samples are a general representation of the wood types & colors. Since nature never duplicates itself, you may notice a slight difference in color from one order to another, between components, even within the same component. We suggest to order a sample door to see actual colors prior to ordering complete projects.

CURVED

Caron's curved component selection is one of the most extensive of the industry. Available in numerous designs, types of wood, center panels, mouldings and configurations for ultimate personalization. While most are designed to cover either a full 1/4 or 1/8 circle, they can also be produced narrower or wider than indicated. In such case, make sure to indicate the chord needed in the radius of your choice. (Also available in custom radiuses.)

CROWN MOULDING, BASE MOULDING, LIGHT VALANCE

Please refer to page 11 to see more mouldings and edge treatments. They can be used as decorative elements, valances, counter top edges etc. (base moulding + door trims 3/8" to 3/4" thick). Also available with groove as door part to be used with Caron's adaptor # 9809 to create crown mouldings which perfectly match your project's door style. (Choose required interior moulding number and add 00* before.) Ask for our designer collection (Ref. Pages 10 and 71) to receive samples of our most popular mouldings.

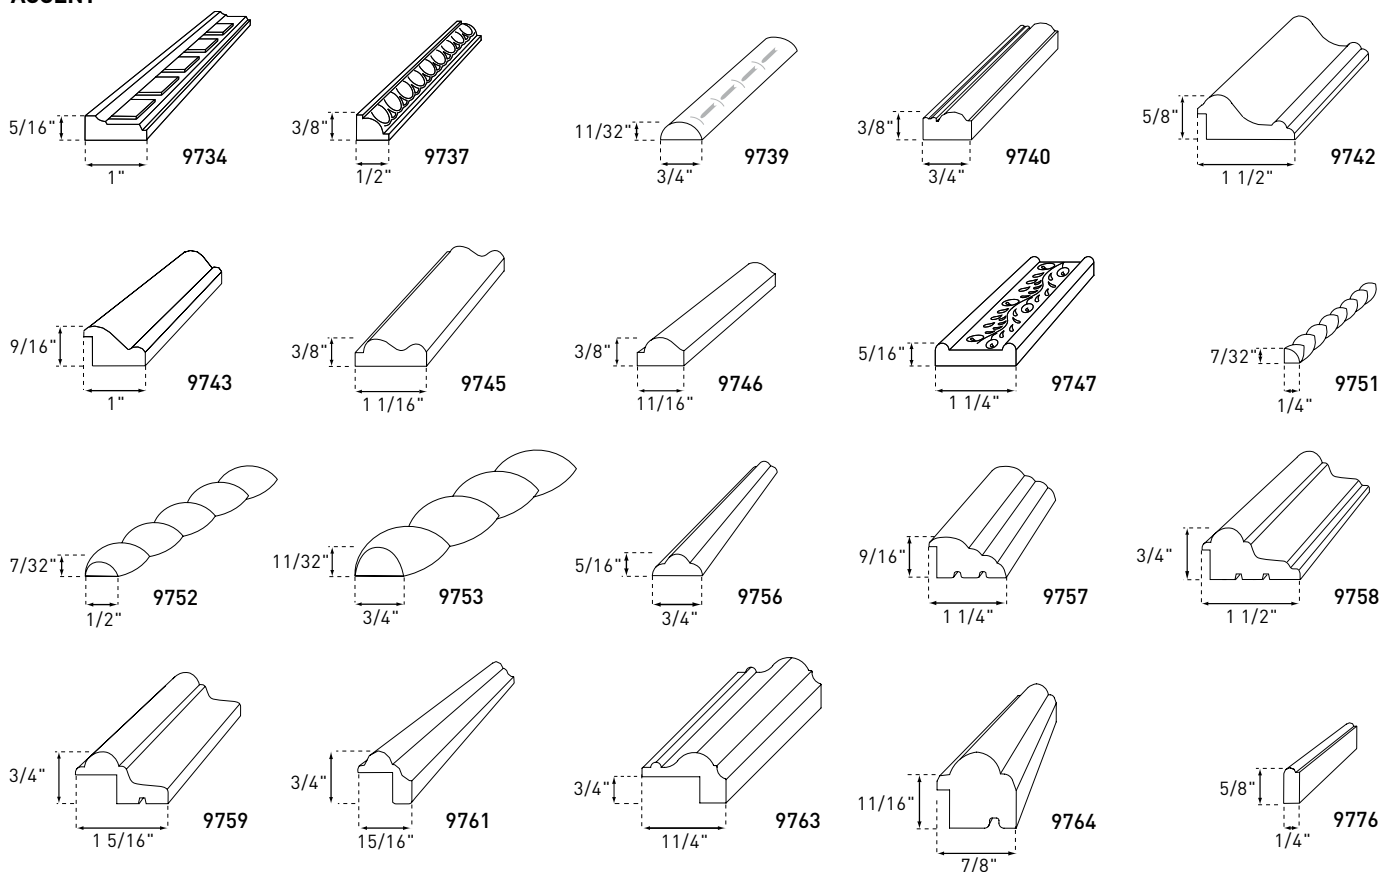

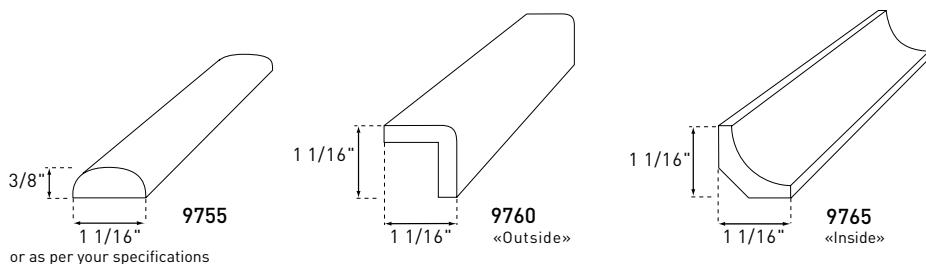

Door design : # 10-1200-E-06-01-(3 3/8")-700-P20
 Open frame design : # 15-1200-E-00-02-(3 3/8")-700-P20
 Turned wooden post 2" : # 90-6300-E
 Crown moulding : # 9840-E #984A-E
 Architectural wood carving : # 90-9350-E
 Wood type : Solid maple
 Color : # 41 Glacis vieillot

Several of these mouldings can be applied on our doors (ref. pages 20-32). They can also be used as a complement elsewhere on your projects.

HOW TO ORDER

6 step check list for easy ordering

1. Get familiar with Caron's Guide and brochures.
2. Use Caron's order/quotation forms (they can be supplied to you at no cost or you can make copies of the next page). You may also order on line at caronindustries.com.
3. Indicate proper codes and numbers (referring to corresponding pages as mentioned above or on the order form).
4. For assistance or any questions: 1 800 463-7060 or view our video "How to order" in our Web Site (Secured section)
5. Indicate clearly if this request is an order or a quotation (check appropriate box at bottom of page).
6. Forward your request via:
 - FAX: 1.800.463.3656
 - EMAIL: orders@caronindustries.com
 - ONLINE: caronindustries.com
7. Double check carefully all key information on the order confirmation: to be signed only if there are no modifications.

GROUP # AND DESIGN #

These two first specifications are the most important as they define the nature of the selected component. Thus, the group number indicates whether it is a door, drawer face, etc. and the design number defines its configuration: square, arched, etc.

Please refer to pages 4, 5 and 6 for complete description of grades and wood types available, pages 34 and 36 for most popular multi panel door configurations.

New

MINIMUM AND MAXIMUM SIZE

Even though we produce components up to 10' tall by 5' wide, maximum sizes vary depending on design and wood type chosen. As a general rule, we suggest to use two or more components that you fasten together instead of a very large single one. This is to minimize freight damage, increase product stability and ensure you better guarantee coverage.

As for minimums, Caron offers so many possible combinations that it would be very difficult to confirm them all. However, this catalogue contains all information needed to find most of them.

Minimum width Solid raised door example :

$(\text{width of stile} \times 2) + (\text{center panel reveal} \times 2) + (1/2'' \text{ center panel flat section}) = \text{minimum width}$

Minimum height Solid raised drawer front example :

$(\text{width of crosspiece} \times 2) + (\text{center panel reveal} \times 2) + (1/2'' \text{ center panel flat section}) = \text{minimum height}$

IMPORTANT NOTICE : Please refer to pages 10 and 11 for center panel reveals and moulding widths.

For all minimums do not forget to add the width of the accent moulding $\times 2$ for any option applied on center panel.

To lower minimum heights on drawer fronts :

- Reduce crosspiece width (Ref. Page 74**)
- Reduce center panel reveal (Ref. Page 10)
- Reduce center panel flat section (according to knob or handle back plate specifications)
- Reduce applied moulding width (if applicable)

PRODUCTION TIME

Caron's short estimated production time will be confirmed on each one of your orders or quotations. Please take notice production time starts after reception of your final confirmation and after credit approval. This does not include transit time nor does it include weekends, statutory holidays and / or thins beyond our control such as major storms and power failure, etc.

N.B. Estimated production time varies depending on design, wood type and options ordered. It may also vary during the year according to the demand.

Rush orders / V.I.P. service

For emergencies, estimated production time can be reduced by half*. Ask for our V.I.P. service to get all details. (* Conditions may apply.)

Info shipping service

To facilitate your planning, Caron's exclusive info shipping service will let you know immediately each time an order is leaving.

GUARANTEE OF SATISFACTION

- Inspect goods upon reception.
- In case of shortage, damage or non conformity, make note on the bill of lading before signing. Check contents for shortage, accuracy and concealed damage. Notify us within 24 hours of any discrepancies. Failure to follow these steps relieves CARON and the carrier of all shipment responsibilities.
- Once above steps completed, ask for an authorization number prior to sending anything back. (Always use original packaging.)
- Broken and / or non conform components will be replaced and / or repaired within the shortest possible time.
- To reduce warpage, shifting or splitting of wood, avoid sharp changes in temperature and keep relative humidity between 30% and 40%.

Components over 45" high will automatically be made WITHOUT middle crosspiece unless specified otherwise. Ask for a middle crosspiece for warpage guarantee coverage of more than 9/32". (Valid up to one month after date of shipping.)

Components over 45" high with no middle crosspiece will carry no guarantee. In some cases, the use of two doors is recommended.

Any component over 26" wide requires a middle stile to be guaranteed.

Tolerance for dimension : **± 1 mm on exterior measurement**
 ± 2 mm on parts of the same component

Tolerance for 45° joint : **0,010" (0.254 mm) for expansion**
 (Based on frame parts of 2 7/8" wide)

Tolerance for warpage : **45 1/16" high with middle crosspiece : 9/32"**
 *** 50 " high with middle crosspiece : 5/16"**
 *** 60 " high with middle crosspiece : 3/8"**
 (We suggest to use additional hinges or two doors)
 Door / Drawer front design #6000 : 1/8"
 (if less than 1.5 sq. feet of total surface per component)

N.B.: Our guarantee is applicable for goods returned in original sale condition only. It covers component repair or replacement and shipping only. Guarantee does not cover installation, removal or labor of any kind. Nor does this guarantee cover any product used or installed in connection with our products. This guarantee does not apply to damage resulting from improper handling, alterations, storage, or use in non controlled environment (recommended : 30 to 40 percent humidity) nor does this guarantee cover any joint showing when solid color finishing is used.

CARON reserves the right to make technical improvements or changes on their products and / or their documents without prior notice.

Drawings in this catalogue and / or any other document are not to scale.

MAINTENANCE

Clean with a moist cloth using a low concentration of soap with water.

Buff with soft cloth in direction of wood grain.

Remove any excess moisture with clean dry cloth.

To reduce warpage, shifting or splitting of wood, avoid sharp changes in temperature and keep relative humidity between 30 % and 40 %.

The CARON signature on the back of each component your receive confirms that the product complies with the highest standards (quality management system registered under ISO 9001). It also indicates you are part of our reforestation program, giving back to nature... 10 000 trees planted yearly, a premiere in the industry since 2005.

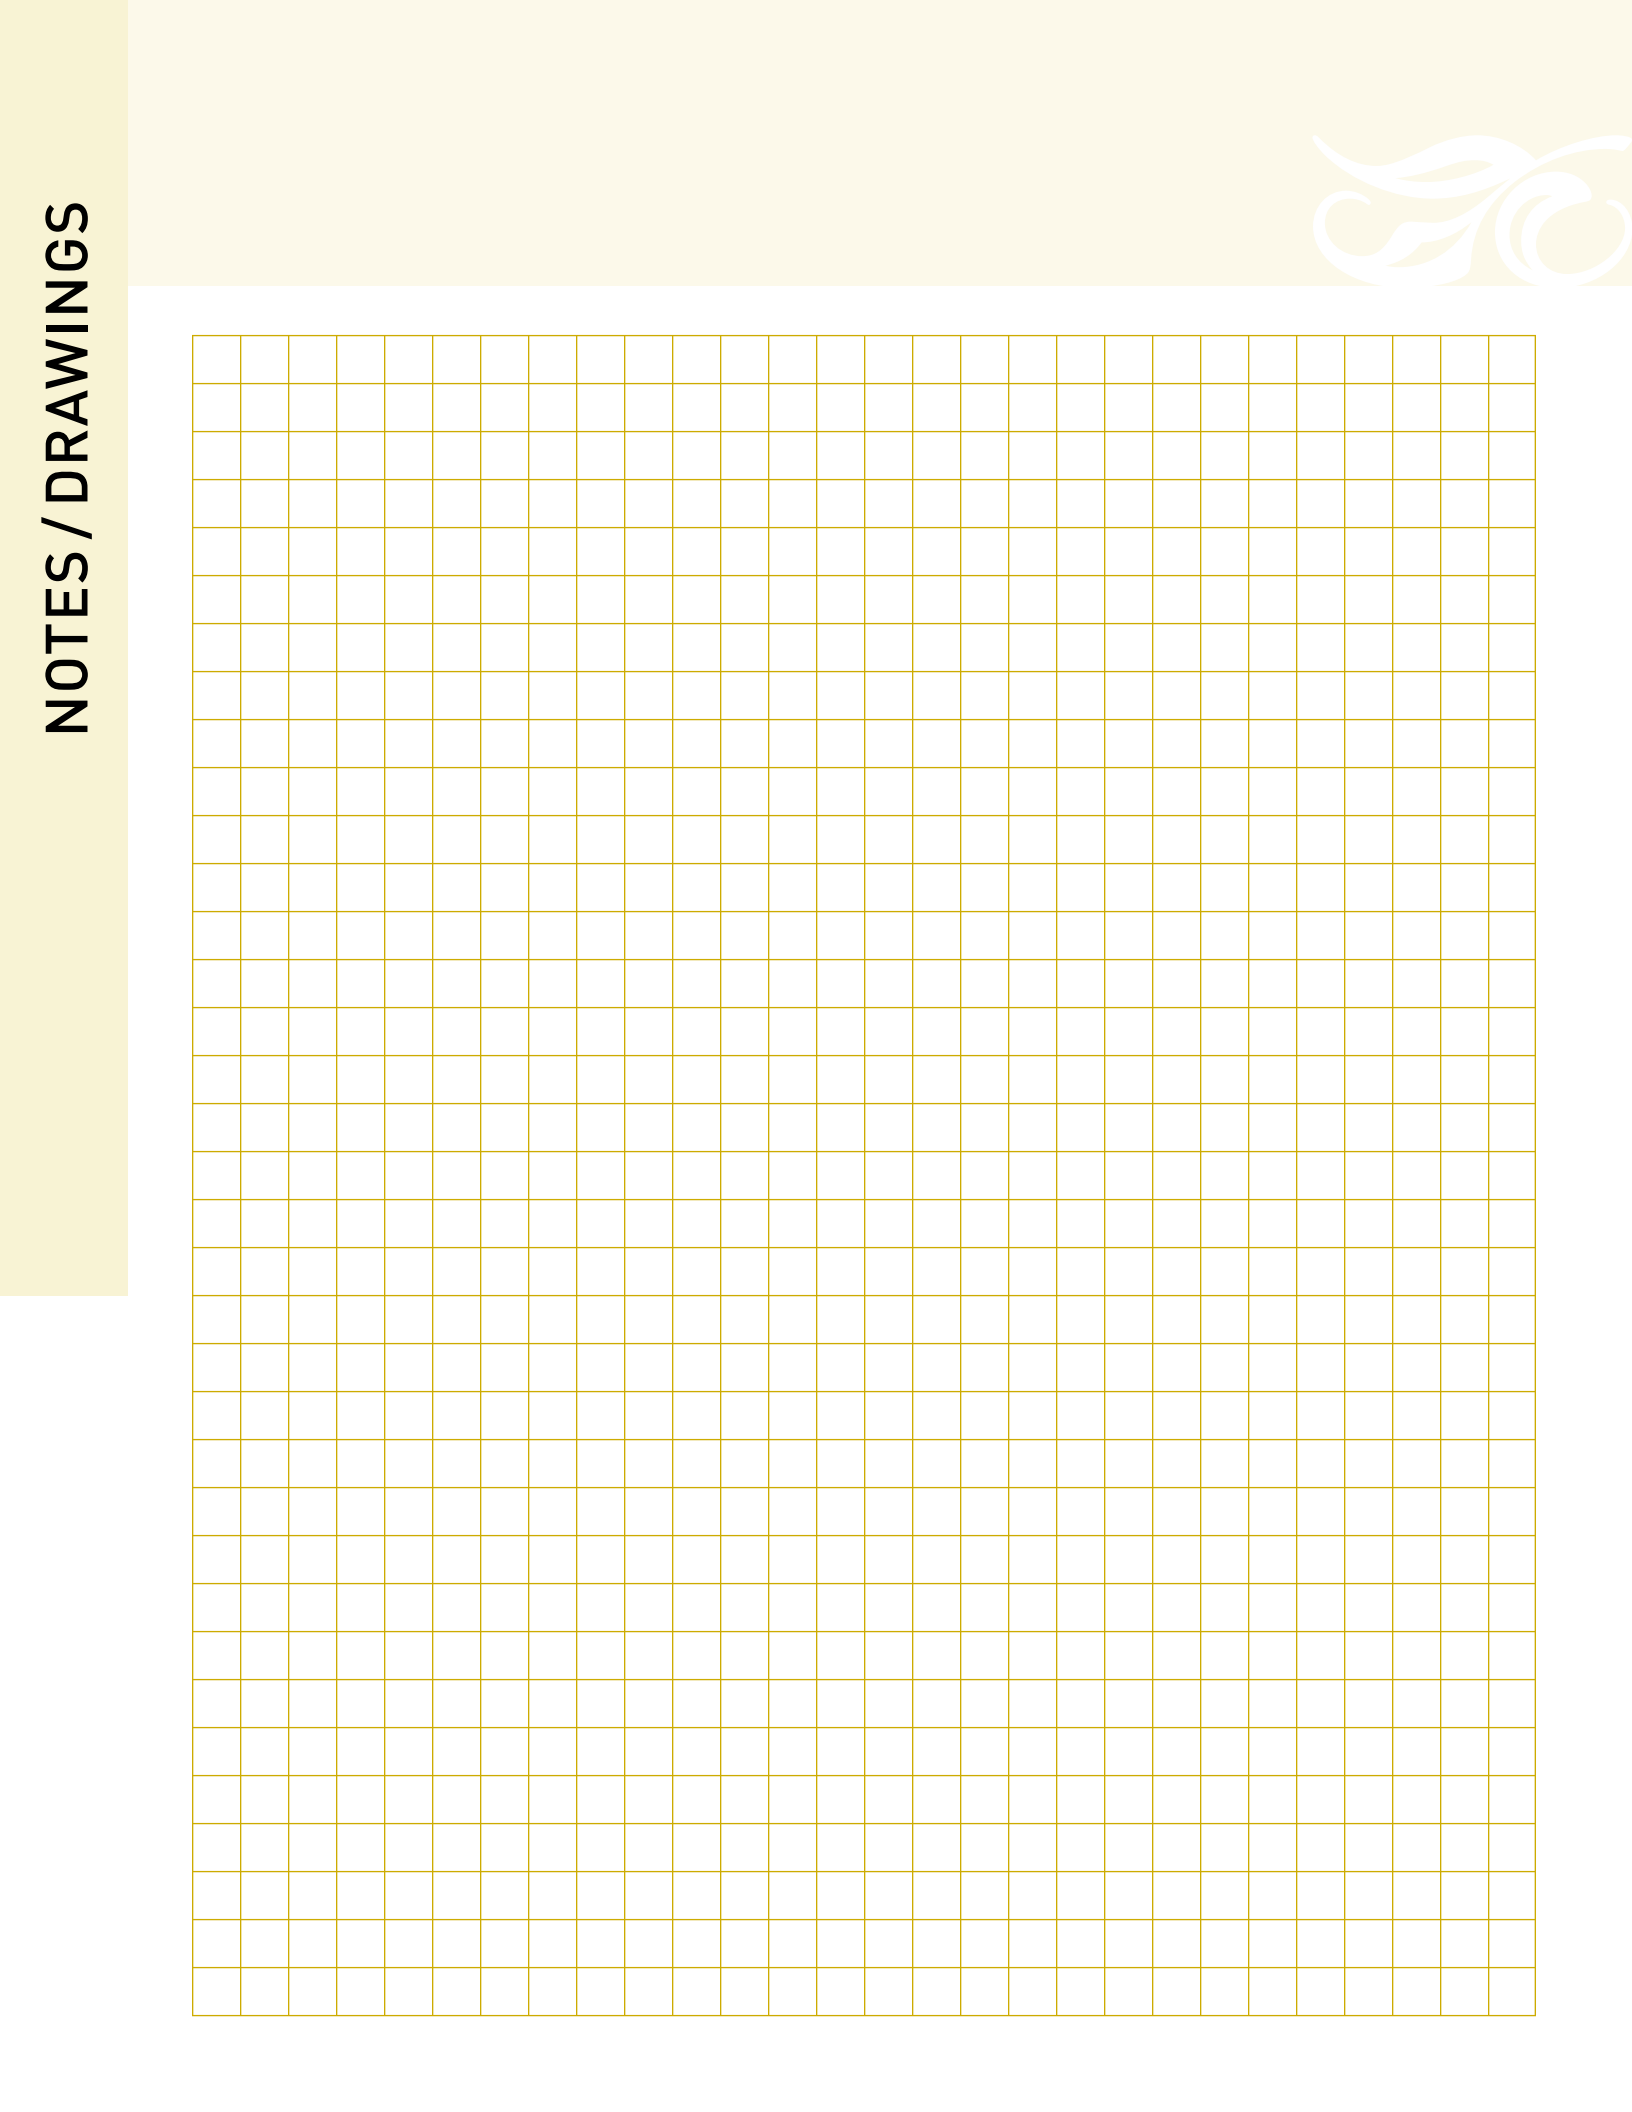

Proud partner since 2005

AMERICAN FORESTS

This image shows a full-page view of a blank sheet of graph paper. The paper has a light cream or off-white background. A large, uniform grid of thin yellow lines covers most of the page, forming small squares. In the top-left corner, there is a decorative white swirl or flourish design against the cream background. The entire sheet is set against a solid black background.
